Municipal Hospital a Live Issue

First step to establish Municipal Hospital District is now being taken. Petition asking government to establish municipal hospital area is now in circulation for signature.

(Ed. Note.—This is the 16th article dealing with Municipal Hospitals and the desirability of establishing one at Oyen.)

Obedience to sane rules of health bring better results than obedience to those bringing wealth.

The petitions forwarded by the government are now in the hands of the canvassers. They should be completed at the earliest possible moment and returned, so that they may be forwarded to the government.

Any canvasser who finds himself indisposed or otherwise unable to carry out his duties is asked to either make arrangements with someone to fulfill his duties, or return the petition at once so that someone else may be given the petition to obtain signatures.

There still seems to be some questions that have not been satisfactorily answered, one of which is concerning the attending doctor's fees. There are a considerable number who have been misinformed on this point. At present the municipal districts are responsible for the hospital charges only of a patient. Doctor's fees are not chargeable to the municipality; neither are the same fees chargeable to a municipal hospital. The report that medical fees are chargeable to a municipal hospital is entirely unfounded, so those who have been thus informed need have no fear, for medical or surgical fees must be collected by the medical man attending the individual patient.

Another erroneous report is that the board can levy what taxation they desire. They can up to \$6.00 per quarter section, which is the maximum amount. If the proposed hospital here was going to cost more than that per quarter section per year, the government would not sanction the scheme.

It has been said that the high cost of living today is equalled only by the high cost of illness. Certain it is that sickness is an expensive calamity, especially where municipal hospitals have not yet been established. The thought of illness is often a nightmare to people whose incomes are small. For some time past, there has been all over the country, considerable agitation for hospital co-operation with adequate attention and facilities for people of modern times.

Dominion Oratorical Contest

The local elimination contest will be held in the Oyen Theatre on Wednesday, March 14 at 8 p.m.

The purpose of this contest is to select a candidate to represent Oyen School in the District contest, in which contestants from all parts of the Oyen Inspectorate may take part. The winner of that event will represent the Oyen Inspectorate at Calgary on April 12, when the champion for Southern Alberta will be selected.

In order to give the local contestants as good an audience as possible, everybody who can be present should make an effort to attend. A programme is being arranged, to supplement the work of the contestants.

Keep in mind the date, the hour and the purpose; and be present, if possible.

Look at your address label!

When the coming of municipal hospitals have filled this long needed page of public health work. These petitions offer to you the maximum service at the minimum cost. Is that not what you desire? Then it is yours if you care to vote it!

While it is true that no sick person should be without medical aid, irrespective of their financial circumstances, it is often impossible to give the required treatment, due to lack of hospital facilities, because finances will not permit admission to a privately-owned institution. The next best thing then, is the home, which at best is far from offering the facilities and conveniences of a hospital. In large hospitals, there are free or public wards, but these are charity, and it is not charity that most people want. They want a hospital where adequate accommodation, together with the necessary equipment and appliances are to be had should their illness demand it. A municipal hospital meets these requirements! Do you wish to have them at your disposal in this community should the need arise?

Where municipal hospitals are established, patients are not haunted with the spectre of "the cost." Knowing that the hospital charges can easily be met, relieves many a patient's mind.

Privately owned hospitals have, in many cases, done most noble, if not heroic work, but they must have finances in order to function. Their charges are usually set at a figure to cover a percentage of their accounts which are written off yearly as "bad debts." In other words, a scale of charges for paying patients, sufficient to meet a portion at least of the bad debts is a policy rendered necessary if the institution is to be kept on the right side of the ledger. The whole question presents a problem that not only confronts our community, but is a dark shadow everywhere. The only solution so far lies in the establishment of a municipal hospital—then everyone will share equally in the effort, and the charges are so reasonable as to be within the reach of all. This cannot be obtained under any other plan.

Are you interested in the health and happiness of your community? If you are, you will be an ardent supporter of this campaign.

The New Ford Car

Those who have ridden in the new Ford car, are unanimous in praise of Ford's achievement, and many have expressed the opinion that it surpasses their expectations in every regard.

The 1928 4 inch wheelbase, lower suspension, improved fenders, gracefully contoured one piece fenders, command attention and suggest speed and stability. But it is in performance that the new car is most striking. It is capable of more than 40 miles an hour and will hold that speed without discomfort to passengers and without injury to the mechanism. It accelerates at a terrific pace and can be made to literally leap forward when the clutch is engaged. It has been driven at over 40 miles an hour in intermediate gear. It manoeuvres with great ease, holds the roads at speed, holds on sharp unbanked curves at 45

(Concluded on page 2.)

Tapping Wealth Of Northern Canada

Canadian National Railway Engineer Tells Of Rapid Development

The tremendous North of Canada, the rich country in which millions have been invested and out of which millions more will be taken is opening up into its own. The new railways, which are being pushed forward with all the energy and haste that can command, are opening up the vast expanse of land, strength and speed that man can give, are bringing the wilderness closer and closer to the world. They are making possible the pricing open of a chest whose treasure is so vast that imagination scarce can compute it. Before the year is out the railway which is striking 85 miles northwest of The Pas to open up the Finlay and incidentally the other rich properties in that area will be in working condition. In the meantime, all the necessary supplies will have been brought in and camp established along the way. By the end of next year, the Hudson Bay Railway will have reached its terminus at Churchill, on Hudson Bay, and the North will have a new outlet to the sea.

C. R. Gossow, of Montreal, chief engineer of the Construction Department of the Canadian National Railway, who has just returned east after a visit of inspection to the northern country, declares that he is well satisfied with the progress that is being made.

"To fulfill our promise to the Dominion Minister of Railways that the Hudson Bay line would be in operating condition by the end of next year, we must complete 84 miles from the present end of steel before December, Mr. Gossow says. The present end of steel is 536 miles from The Pas, which is 482 miles from Winnipeg. From the end of steel to Fort Churchill the distance is 154 miles. "There is no doubt but that this will be accomplished," he added. "The road is broken through for the 84 miles and the contractors are erecting camps and getting in supplies. By the second week in February, Major J. L. Charles, who is in charge of the Construction Department of the Canadian National Railway, has just returned, having reached Mile 100 and was, of course, still pushing ahead. He is using dog teams."

Since there are no means of communication in the summer, Stewart and Cameron Ltd., who have the contract for grading the line, are concentrating, during the winter weeks, on the task of bringing in supplies and caching them. Mr. Gossow pointed out. Before the breakup, at least 1,200 men will have been placed and will be engaged in ditching. After the important work of drainage, comes the building of the embankment. It is hoped that track-laying will begin by July 15. In order that there will be no delay, cutovers are being placed ahead for the first 20 miles, after being built for the purpose, and the three streams which the railway must cross are being spanned by pole trestles, which will be replaced by permanent structures later. Three temporary water supply tanks are also being installed in places where the balancing and track laying.

"Our big battle is, of course, with the muskies," said the engineer, in discussing the difficulties of railroad-building in the north. "Near the Limestone River we are cutting 200 carloads of poles and these will be placed on top of the grade, herring-bone fashion, so as to form a foundation for the ties in the soft places. Instead of burning the timber cleared from the right-of-way all this will be saved and used for the same purpose. Hauling will be kept close to the track all the time. There will be two cutovers.

"Two hundred men and 120 teams are now working on the line, and are outside the right-of-way. Besides the men on the Churchill section, 330

The Value Of Sheep Clubs

Responsible For Establishing Over One Hundred New Flocks In Canada Recently

Boys' and Girls' Sheep Clubs have been responsible for establishing over one hundred new sheep flocks in Canada recently. They are proving a big factor in creating further interest in sheep raising and are likely to be the means of establishing thousands of sheep flocks on farms where sheep are not at present being kept.

Sheep club members have the co-operation of the Canadian Banking Institutions in providing loans subject to the regulations of the policy if such are desired. The policy is administered by the Sheep and Swine Division, Live Stock Branch, Canadian Federal Department of Agriculture. In co-operation with the Provincial Departments of Agriculture, District promoters in the various provinces in which the policy is operative give assistance in selecting suitable ewe stock, give direction and assistance in equipment of buildings, feeding and management. The Canadian Co-operative Wool Growers' Ltd., Canada's national wool marketing agency, operated by the sheep raisers, assures full market values for the wool clip. Sheep Raisers and Lamb Sales establish market values, reduce marketing costs and encourage the production of better lambs. Sheep raising is recognized as a branch of the live stock industry that has proved to be very profitable and is strongly recommended for consideration by prospective settlers.

How Rockies Got Their Name

The Name Is Believed To Be Of Cree Origin

The name "Rocky Mountains" appears to be of Cree Indian origin. Long before the advent of the white man the Indians of the Canadian prairies, gazing at the glacially formed peaks stretched across the West, called them the "Shining Mountains." Legardeur St. Pierre in his journal, 1753, stated that among the Crees they were called "Assin-wait," that is, literally, "stone or rocky mountain." He also gave the name in French—"Montagnes des Roches"—and by the English equivalent they have since been known.

Hydro-Power On Niagara River

On the Niagara River, the water-power of which is shared between Canada and the United States, five to six million horse-power could be developed, but by international treaty the United States is restricted to a total diversion of the flow of the river to 20,000 cubic feet per second and Canada to 30,000. These diversions are practically all utilized by the developments now in use.

Reedie Big Contract

A Calgary firm, the Alberta Wood Preserving Company, has been awarded one of the largest wood preserving contracts ever given in Canada. It has an order from the Canadian Pacific Railway for the treating of 20,000 ties a year for a five-year period, 1,000,000 ties altogether. The "treating" process is said to add from 30 to 60 years to the life of the wood.

New Comer Prizes His Land

But To Many Canadian Farmers Ownership Means Nothing

No Canadian need be jubilant when a European family is placed on a farm from which a Canadian family has been removed. Yet this is what is going on in some parts of the country. The original Canadian stock is leaving the land and getting into the towns and cities. The same process is going on in many sections of the United States and is regarded with alarm by students of the social order in that country. The newcomer from Europe prizes the land; to him it is a great boon to be able to own a hundred acres. The Anglo-Saxon in this country regards the land lightly. Ownership means little to him and in many cases he would prefer making his living somewhere else.

Yukon's Healthful Climate

Continuous Daylight In Summer Time For The Whole Twenty-Four Hours

The climate of the Yukon Territory, Canada, is characterized by extremes in temperature and a very moderate precipitation. There is no more delightful climate than that which prevails from May 1 to October 1. The continuous light for the whole twenty-four hours, during the time from the middle of May to the first week in August, although anticipated, is a source of delight and wonder to the visitor. While the winters are long and cold, on account of the absence of high winds and the dryness of the atmosphere, the low temperatures are borne with less discomfort than in other parts not so favored.

One Of Sweetest Stories Ever Told

Annual Consumption Of Sugar In Canada Is Almost One Hundred Pounds For Each Person

One of the sweetest stories ever told is that recorded in a recent issue of the sugar refining industry in Canada issued by the Canadian Government. The statistics show that the Canadians evidently have a sweet tooth, for the annual per capita consumption of sugar is 92.69 pounds, or about one quarter of a pound every day of the year. The total production of sugar in Canada in the year under review was 1,138,781,728 pounds, which 70,388,105 pounds was made from beets grown principally in southwestern Ontario and western Alberta. Thirty acres were sown to beets, which yielded about nine tons per acre, and the growth of the beets was an average price of \$5.55 per ton. The total value of the yield was \$2,236,781.

There are eight sugar refineries in Canada with a capital investment of \$40,748,044. Canada is one of the principal sugar refining countries, her net exports of refined sugar, after supplying her own requirements, amounting to about 250,000,000 pounds yearly.

Cannot Be Called Insane

People Who Fail To Control Their Impulses Have To Be Punished

It is the business of men to control their impulses. When they can't do so—and possibly they can't—what is right and what is wrong, who knows that what he is doing is wrong, is quite sane enough to pay the penalty prescribed by law. It does not matter whether or not he is the victim of a "split personality" or is afflicted with "dermatographia." These are interesting peculiarities, but they are no defence—and are not insanity.

Machinery For Brigetting Plant

Machinery for the brigetting plant at Blentail has been purchased by the Canadian Government. The plant is to be shipped before May 15th, according to the representative of the Western Dominion Colonies, who went overboard to arrange this plant has just returned to Saskatchewan.

"My poor husband was a wonderful artist," sighed the landlady as she hacked at the pie crust. "And always he found inspiration in my cooking."

"A sculptor, I presume," said the gloomy barman, surveying his bent fork.

In China, according to Capt. M. B. Curtis, of the United States Marine Corps, every soldier takes his wife with him. It may be a government plan to keep the boys in a fighting mood.

"Now that you are married, I suppose you will take out an insurance policy?"

"Oh, no. I don't think she's going to be dangerous."

Good Crops Have Established Prosperity

Farmer's Position Has Been Greatly Improved, Says Bulletin

"In contrast with the situation in Canada, where the price structure has consistently favored the farmer, particularly during the past three years, the farmer in many other parts of the world has found that his position is not so favorable. His husband of potatoes could be sold at a price which would enable him to buy only about two-thirds as much of the necessities of life as formerly," states a recent bulletin issued by the Royal Bank of Canada.

"In reality his difficulties have been even greater, since wages, rent and taxes—his costs—have in most cases increased by at least 100 per cent.," continues the bulletin. "Where the individual farmer has been unable to increase his production, the change in relationships of price have reduced the purchasing power of the farm family by about one-half. This reduction in the purchasing of the agricultural population has prevented the expansion of world commerce to a normal level.

"The change in the price of the agricultural products in Canada and the persistence of relatively favorable world prices for those products, which came from the fact that the Canadian farmer has been able to increase his production, is establishing prosperity. While it is true that almost all of Canada has experienced a good time during the period, the outstanding factor in the situation has been the improvement in the position of the Canadian farmer."

Then, if one could draw off the water from a swimming pool, and in a vacuum, they asserted, the water thus drawn off would begin to boil, producing a vapor which, with the aid of the cold water brought up from the depths of the sea, might readily be condensed.

And in the case of vapor one placed a turbine, they declared, the machine would furnish energy beyond comparison with anything in existence.

Only Sense Not Protected

Law Does Not Interfere With Things Which Offend Our Sight

If you punch a man on the nose, he can have you arrested. The law protects our sense of feeling. If your factory pours noxious fumes over a city, your neighbors can get out an injunction against you. The law protects our sense of smell.

If you put even harmless chemicals in a public highway in such a way as to offend our sense of taste. The law protects our sense of taste.

If you run your loudspeaker at unreasonable hours, the law will have something to say about it. The law protects our sense of hearing.

Sheep Raising In B.C.

Sheep Raising In Province Increased By 27 Per Cent. Last Year

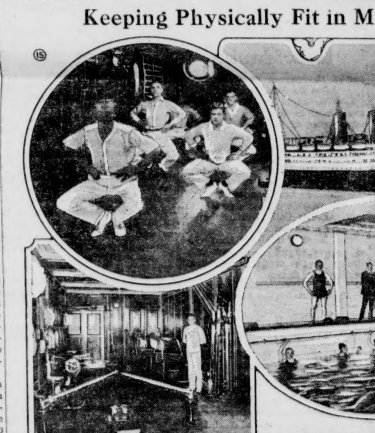

The sheep raising branch of the agricultural industry is developing rapidly in British Columbia, particularly in the logged off areas along the mainland coast and on Vancouver Island, according to a report of the Vancouver Chamber of Commerce. The province increased sheep production 27 per cent. in 1927 over 1926, the latter year also having an increase of 26 per cent. over the year previous.

Don't condemn a man for beating his wife until you ascertain whether he used a club of a pack of cards.

Talkative Barber: "Would you mind closing your mouth?"

Customer: "No. Would you?"

—Rena Ranner, Madrid.

Upper left—a physical class in operation. Upper right—the Canadian Pacific line's "Empress of Australia." Lower left—interior of the "Empress of Australia." Lower right—the ship's swimming pool.

A gymnasium on board an ocean liner is no longer a novelty. The floating palaces of today which cross the mighty oceans between Canada and the Orient, and Canada and Europe, have gone one better than the best hotels. There are hotels in this country that can invite their guests to bathe in private swimming pools; but how many of them can offer the busy man or woman the use of a gymnasium?

"How to keep fit at sea?" Boats one of the famous "White Empresses" bound for the Orient from Vancouver, and en route to Quebec to Southamption by an "Empress of the Atlantic." These liners have gymnasiums on board, and you will have no reason for the consequences of a period of enforced leisure. On the Pacific the "Empress of Canada," "Empress of Asia," "Empress of Russia," have gymnasiums which are in all respects like those of the three Atlantic Empresses. Spacious rooms, the latest equipment, and fitted with the latest equipment for almost every phase of athletic exercise. In addition, the Empress of Canada and the Empress of Australia have swimming pools, which are in the first rank of those to be found on board sea-going ships.

The apparatus with which the

gymnasiums of the ships of the Canadian Pacific line are fitted is varied and diverting. The "horse" and the "camel" are perhaps the most popular among the machines. When travelling on the "Empress of Australia" and the "Empress of Scotland" to and from Canada this summer the Prince of Wales, during his many imaginary miles on the comfortable class of the "horse" and also on the "camel" jump. These beasts are electrically controlled, and when the current is switched on the "horse," which is properly saddled and has complete stirrups, proceeds to emulate the movement of a horse in motion, and gives the rider a real and pleasant sensation of horse-back riding. The speed can be increased from a walk to a trot, from a trot to a canter, and from a canter to a gallop; but the "horse" is always a gentle beast and never throws his rider.

The "camel" machine is as popular as the "horse." The "camel" is in a similar manner to the horse, but performs the rolling motion peculiar to the "ships of the Sahara." The "camel" machine is also used when the Round the World and Mediterranean Cruise Empresses are making happy, the ladies especially being anxious to accustom them-

selves to riding on the hump of a camel.

There are bicycle machines in the gymnasiums of the Empresses. These are fitted with dials which record distance travelled up to 500 meters. Bicycles are placed side by side, which offers the possibilities of racing.

Boxing machines, pug-machines, which test the strength and develop the muscles, are amongst the apparatus with which the gymnasiums are equipped, and boxing-gloves, medicine-balls, punch-balls, foils, single and double blades, clubs, broadsword, fencers, and Indian-club artists amongst the passengers with every opportunity of indulging in their favorite pastime.

The gymnasiums themselves are spacious rooms, well ventilated, and are fitted with electric fans which help to keep the air always fresh. During certain hours the rooms are reserved for the exclusive use of the lady passengers.

A physical instructor is on duty in the gymnasiums during the regular hours. He instructs passengers in the use of the machines, and during longer voyages and winter cruises made by the Empresses, classes for physical exercises are frequently held.

Expedition To South Pole

This is the "Hampton," the Norwegian ship which Commander Richard E. Byrd's expedition to the South Pole will use. He will be accompanied by three men, with which he hopes to fly over the Antarctic Zone.

Byrd's expedition to the South Pole will use the "Hampton," the Norwegian ship which Commander Richard E. Byrd's expedition to the South Pole will use. He will be accompanied by three men, with which he hopes to fly over the Antarctic Zone.

Don't condemn a man for beating his wife until you ascertain whether he used a club of a pack of cards.

Annual Honey Production In Western Provinces Shown To Be Rapidly Increasing

That Canada is a wonderful country for beekeeping is shown by an undated fact, due chiefly to the wide range of flora and high average of favorable weather. The selection and ingathering of nectar. Moreover, the greater part of the honey produced in Canada is of high quality, both in flavor and body and being white in color, is most suitable for table use.

Until quite recently, beekeeping was practically confined to the older provinces in Eastern Canada, especially Ontario and Quebec, and to British Columbia, the surplus produced by them was absorbed by the Prairie Provinces. During the past five years, however, not only has beekeeping increased in the East but it has made a rapid advance in the Middle West, and because of this growth Canadian honey is now being exported to European countries where it is most favorably regarded. The total crop for Canada for 1925 was estimated at over 19,000,000 pounds. Of this, Ontario produced 10,000,000 pounds; Quebec and Manitoba each over 4,000,000 pounds; British Columbia, 650,000 pounds; and Saskatchewan, Alberta, and the Northwest each over 100,000 pounds. No record of actual production is available from Western Canada and from the latter lands but from the total crop estimate given above it will be seen that the production from these provinces is relatively small. The production of honey produced throughout the Dominion of course, varies from year to year, according to weather conditions. For instance, 1925 was a favorable year in this respect for Eastern Canada, but not so good for the West; while 1926 was just the reverse, that is, a favorable year for the West and a poor one for the East, as the following crop figures for 1926 will show. New Brunswick, 100,000 pounds; Ontario, 5,000,000 pounds; Quebec, 5,322,512 pounds; Saskatchewan, 170,287 pounds; Alberta, 215,000 pounds; British Columbia, 650,000 pounds. The Quebec figures for 1926 are not yet available. In comparing 1926 figures with those of 1925, it will be seen that, with the exception of Manitoba, the honey crops of the western provinces were much larger in the summer year. Reports of the 1927 crop so far received show that in western Canada the past season was even more favorable than 1926. The reports for the crop of 7,330,575 pounds and Saskatchewan, 550,974 pounds. Crop reports from the other provinces for 1927 are not yet available.

While honey production is steadily increasing throughout the Dominion, there are large areas yet undeveloped in so far as beekeeping is concerned; this is especially true of western provinces. The changing farming conditions in the more fertile parts of the Prairie Provinces, the opening up of new territory, and the introduction of irrigation in the arid areas, are having an effect on beekeeping possibilities. For instance, the introduction of sweet clover into Manitoba and Saskatchewan is largely responsible for the increase in beekeeping in these two provinces. In the Peace River district where beekeeping is a comparatively new industry, an experimental apiary at Beaverlodge, Alberta, gave a wonderful crop during the summer of 1926. A colony on scales registered a gain of 20 pounds per 24 hours on more than one occasion and at the end of the season this colony gave 281.5 pounds of surplus honey, and in addition gave one colony increase. Other pioneer apiaries reported equally good results in the irrigated areas, where alfalfa and sweet clover are grown extensively, good crops of honey are assured. In British Columbia, the river valleys offer splendid opportunities for beekeeping, especially in the central part of the province. In Ontario and Quebec the honey crops of the provinces are fairly well stocked with bees but the newer parts of the provinces offer what is practically an undeveloped field.

Testing Saskatchewan Clay Clay from 22 different deposits in the western part of the province are under test in the Department of Ceramics, University of Saskatchewan, to determine the value of the manufacture of whiteware. This classification includes such products as household ware, electric porcelain and floor and wall tile.

The Girl—"I should think you'd feel happy as a king when you're in the air."
Aviator—"Happier. I'm an ace."

W. N. U. 1721

Farm Land Values Increase

Owing To Good Crops In Alberta

Prices Advance Ten Per Cent.

Farm land values in Alberta have advanced in the past year by reason of the excellent crops produced. Since June 1927 it is estimated land values in the better districts have increased on an average by ten per cent., while in districts where crops have been exceptionally good and the number of new settlers large, the increase has amounted to 20 per cent. This is particularly true of the Peace River district where the value of good farms, reasonably close to transportation, has increased more than any part of the province.

For each farm in the province the average production during 1927 was \$4,383 according to the Provincial Minister of Agriculture. Against this he gives average production for some of the states of the Union for 1925: Montana, \$2,514; South Dakota, \$2,255; Iowa, \$2,262; Minnesota, \$1,977; Kansas, \$1,886. Average production per acre in farm in Alberta in 1925 was \$3,104.

Machine To Combat Smut

Saskatchewan Registered Seed Growers Have Installed New Device

Installation of machinery that is unique in any seed plant on the American continent has been effected by the Registered Seed Growers' Association at Regina, with a Koppert-Karsonite power machine coming in.

Operation. The machine is primarily designed to combat smut. The seed is powdered with copper carbonate and 100 bushels can be treated in an hour. The machine has been purchased by the Seed Growers to permit them to supply the farmers with pedigreed seed treated to combat any danger of smut when sown.

Winnipeg Newspaper Union

Has Accepted Offer To Join I. F. of C. L.

The Quebec figures for 1926 are not yet available. In comparing 1926 figures with those of 1925, it will be seen that, with the exception of Manitoba, the honey crops of the western provinces were much larger in the summer year. Reports of the 1927 crop so far received show that in western Canada the past season was even more favorable than 1926. The reports for the crop of 7,330,575 pounds and Saskatchewan, 550,974 pounds. Crop reports from the other provinces for 1927 are not yet available.

Screenings Classified

Reclaimed Elevator Screenings The Most Important Class

Screenings is a by-product of the grain industry and is now available commercially to Canadian stockmen. It consists of the broken and uncleaned grain, weed seeds, including wild buckwheat and wild oats, chaff, etc., removed from the grain delivered to the terminal elevators and constitutes about 15 to 25 per cent. of the total grain received. This by-product is reclaimed and classified into re-cleaned elevator screenings, oat screenings, and refuse screenings, a classification which although still unofficial is recognized by the Grain Inspection Department and complied with by most of the elevators. A new Dominion Department of Agriculture pamphlet on "Screenings As a Feed For Live Stock," gives the composition of the grades, by far the most important grade is the one named re-cleaned elevator screenings. It contains about 50 to 70 per cent. of wild buckwheat, 20 to 40 per cent. of broken and uncleaned grain, and 10 per cent. of wild oats, and not over 3 per cent. of small weed seeds. When finely ground it has been found to be a very valuable feed for growing and fattening pigs and for fattening sheep. The second grade, oat screenings, contains about 75 per cent. of wild oats, 15 per cent. of domestic oats, and a small percentage of barley and an occasional wheat kernel. It has been found to be a valuable feed for that of re-cleaned elevator screenings. The third grade, refuse screenings, consists of small weed seeds, chaff and the dust and dirt accumulating from reclaiming. It has been found to be of little or no feed value. These three grades, a fourth grade, called elevator screenings, used. It includes any screenings not falling into the first three classifications. The grain and dirt and refuse screenings provided the required minimum percentage of wild buckwheat and wild oats are put into this class. The pamphlet, which being given by instructors of the Experimental Farm's experiments to ascertain the feeding value of the various grades of screenings, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Farm Lands At Premium

Few Farms Are Available For Rent in Western Districts

Farm lands are almost impossible to rent around Brandon, according to a report from the local real estate men. There is a shortage of farms being for rent nearby farmers have availed themselves of the opportunity of acquiring more land. There is a most optimistic outlook here.

British Columbia Lead-Producer

Approximately 94 per cent. of Canada's output of lead and 92 per cent. of the zinc comes from British Columbia, the remaining 6 per cent. of the lead originating in Ontario, the Yukon, and Quebec, and about 8 per cent. of the zinc in Quebec.

Burke—"What! You've burned only one ton of coal so far this winter?"

Mason—"Yes, the other five tons wouldn't burn."

There is something wrong with the woman who talks only when she has something to say.

Ice Sculpture in Quebec

Just towards Carnival time in Quebec examples of ice statuary begin to appear in the streets. This statuary consists of many models of ice carved to most amazing conceptions such as a railway locomotive, a dog team and sled or a carriage (habitant) sleigh complete with horse and driver. The models are not fresh but are carved decoration but embody very real artistic values and are usually not up before the Carnival processions.

ADVERTISING CANADA

Splendid Publicity Given Dominion Through Poultry Congress Last Year

Professor Harry H. Lewis, Secretary for Agriculture for the state of Rhode Island, and President of the United States National Poultry Council, was one of the most enthusiastic delegates to the World's Poultry Congress last July. He is now giving evidence of his impressions after participating in the Congress through Canada tour.

Since his return to the United States, he has addressed poultry associations, banquets and clubs, among the latter being the Frenchtown Community Club, the Rhode Island Club, the Lions' Club, Rhode Island Club, the Southern New England Textile Club, and the Varum Continental, the chartered military command of Rhode Island.

He has given these people of his state details of his trip through Canada, illustrated by maps, photographs, and motion pictures. He has given these people of his state details of his trip through Canada, illustrated by maps, photographs, and motion pictures.

Mr. Oscar Brown, of Southport, Lines, England, also participated in the trip, and he writes that he has had the pleasure of broadening his impressions of Canada. Mr. Percy A. Francis, of the British Ministry of Agriculture, also participated in the trip, and he writes that he has had the pleasure of broadening his impressions of Canada. Mr. Percy A. Francis, of the British Ministry of Agriculture, also participated in the trip, and he writes that he has had the pleasure of broadening his impressions of Canada.

Italy is also actively advertising Canada. One of her chief delegates to the World's Poultry Congress, Prof. A. Gagli, of the University of Bologna, is writing a book entitled from "Natura to Mater". This will contain many views of Canada, and will cover the country from coast to coast.

Canada is being advertised as a result of the World's Poultry Congress. The advertising is of the best kind, and the information given by people who returned to their homes armed with Canadian sunshine, hospitality, and achievement. Further, being given by instructors to students, to agriculturists and others and by the representatives of the press who accompanied the Congress train. Canada is being advertised as a result of the World's Poultry Congress. The advertising is of the best kind, and the information given by people who returned to their homes armed with Canadian sunshine, hospitality, and achievement. Further, being given by instructors to students, to agriculturists and others and by the representatives of the press who accompanied the Congress train.

The "Report of the Congress Proceedings" is a splendid volume of 558 pages is now ready for distribution. It contains over 160 technical papers presented at the Congress, together with a verbatim report of the general meetings. Full particulars regarding this volume may be obtained from the World's Poultry Congress Secretary, Ottawa.

Makes Violin By Touch

Starting the work with a pen-knife and a file, Mr. Ernest Hall, a blind music-seller of Manchester, England, has made a violin in seven months, although he knows nothing whatever about the instrument. Mr. Hall has done all the work by finger touch. The only aid he has is to him he got a violin as a model.

Car Salesman—"Wouldn't you be interested in a car with a worm drive?"

Madam—"No, I wouldn't trust my husband as the steering wheel—wren's going to have a chauffeur!"

Herring flour is used quite extensively in Norway.

Canada's Trade With U.S.

Canada's Spend Over \$70 Per Head

In One Year Across the Line

Official figures recently issued dealing with the trade of Canada for the year 1926 show that more than \$70 per head of the population of Canada was spent in the United States.

The total trade of Canada for 1927 amounted to \$2,325,899,924, an increase of \$326,618,779 over 1926. Reports had a total value of \$1,238,782,000, imports \$1,087,000,000.

Canada bought goods from the United States in 1927 to the value of \$707,704,444, or \$46.85 per head of the total population of Canada in the whole of the British Empire.

The United States was Canada's best customer in 1927, as an individual country, with \$47,558,125 spent on Canadian goods. All the countries in the British Empire spent \$300,019,346 in the year under review. Great Britain headed the list with a total of \$409,531,767.

The chief item in the exports from Canada to the United States was wood and paper with a value of \$237,466,149. Agricultural, vegetable and animal products valued at \$147,360,000.

The third largest item of which the value was \$118,834,017 was the principal item, grain and grain products valued at \$118,834,017.

Meats, under which heading a variety of goods are listed, was the principal item in the imports to Canada from the United States, the value being \$270,107,486.

Canada spent \$35,523,107 more in the United States in 1927 than in 1926, while that country's purchases from the Dominion increased by \$9,252,925 over the previous year.

Development Of Civil Aviation

Plans for the development of civil aviation in Canada are developing at a rate fully up to expectations. There are already twelve well established clubs and a dozen more in the formation stage. It is expected that by summer fully fifteen flying clubs will be in active operation, with membership in excess of 1,000.

The modern sleek is very often the living fiasco of an unpaid tailor bill, flying varying from 25 to 150.

To Ensure Satisfactory Yields Careful Selection of Seed Wheat Is of the Utmost Importance

PLANNING TRIPS TO EUROPE

Personally Conducted Tour Has An Interesting Itinerary

With winter on its last legs (why not be optimistic?) and summer in the offing, Canadians are beginning to plan trips to Europe and the railways and steamship companies are making their preparations.

Arrangements have been completed between the Canadian National Railways and the White Star line for the third annual personally conducted tour of Europe, which will commence on July 7, when the Laurentic sails from Montreal. A great many winter Canadians, including school teachers, who are always good summer travellers, are already preparing to attend to their bank accounts, and are making inquiries about the itinerary. It is an interesting one. After eight days at sea, the motor coach trip through England and Scotland will commence. The English Lakes, Carlisle, and the Scottish Highlands will be visited on the first day; a trip through the Burns country will wind up at Glasgow, and the tourists will go to Newcastle.

Roots As Feed For Horses

Turnips Or Carrots Are Good For Horses During the Winter

Roots are a valuable feed for horses under many conditions. For instance, they are good for horses doing moderate farm work during the winter. Two or three turnips or a few carrots thrown into the manger when the horse comes in at night will be greatly relished. Turnips or carrots are more acceptable to horses than mangels, and they should be given whole. According to a new bulletin of the Dominion Department of Agriculture, "Growing and Feeding Field Roots," the merits of roots as a feed for horses may be summed up as follows: They increase palatability, increase the digestibility of coarse fodder, benefit the teeth and gums, form a splendid tonic, and cheapen the ration.

Reindeer Farming In Arctic

Alphas Now Being Used To Advantages To Herd Watt Numbers

Alphas are now being used to herd watt numbers of reindeer in the big Arctic stock farms, according to Ralph Lomen, pioneer of the reindeer industry of Alaska. "It's a new idea and it's not being practiced regularly, but herding by alphas seems feasible," said Mr. Lomen. "Our head herdsman went out recently and in two weeks accomplished more than would otherwise have required a week with six men. There is room for 12,000,000 reindeer in the northern part of Canada and such a herd would be worth \$30,000,000. It could be done in 50 years if Canada started now in a modest way."

CHAPTER XIX.—Continued.

It was strange for Arthur Warner, after all his lonely years, to be sitting there talking so intimately to a woman who was a comparative stranger, and receiving from her confidences which she had never given to one else. He thought of his own lonely house—no precious to him, so eagerly acquired, so patiently worked—how a woman like this would have brightened it and graced it with her presence. She was so calm, so gay, so gentle.

When their eyes met Helmi smiled encouragingly at him, though sadly too, as if the tears were not very far away. Were they tears because he was going?

"Helmi," he said, "we are both facing the elemental things of life, and I draw you together. We are facing the hardest things that men and women ever have to face. Your part will be to give life, maybe at the expense of your own. Mine is—God forgive me—to take life. Are you afraid?"

"I'm not afraid," she said. "No," she said, simply, "I believe in God—I believe He loves me. I love Him. Every day I say my good words. I learned them in His house. They are, 'Clerical health; Seek truth; Know God; Serve others.' Then I say, 'Praise God, bring home my Jack.' It is good to know Mr. English, when one is afraid."

The first rugged whistles of the train came booming down the valley. "Tell me your name Helmi," he said, "I want to say good-bye to you and for your Jack."

Helmi took his hand and impulsively kissed it. "Helmi Doran," she said. "I am glad you will say good-bye to my Jack. Maybe he will see him over there—I know he will go."

"I hope for your sake that it will be the eyes when Jack comes home at Christmas."

He was standing up now with his cap in his hand. The train was whistling again as it came slowly down the grade. Helmi looked at him reverently. It was not merely a lonely, motherless home that she saw standing before her; she saw a brave man who was willing to give everything he possessed, not withholding his own life, for the cause of human liberty, and on his face she saw the unmistakable majesty which comes to those who are appointed to die.

Arthur Warner bent over and kissed her shining hair. "Good-bye, dear Helmi," he said.

"Good-bye, God bless you, dear Mr. English!"

When Arthur went out he met Mrs. McKinnon coming in. She had come presumably to ask Helmi what she had done with the tin-can.

CHAPTER XX.

It was in December that Helmi decided to delay no longer, she would go to the city. Jack had told her to go to his mine house and get the two

Demonstrates New Camera

Spark Instead Of Shutter Gives More Exposures Per Second

Moving pictures taken at the rate of 50,000 exposures a second showed a bullet apparently barely moving as it shattered a glass bulb were shown to a meeting of the Optical Society of America.

Professor Alexander Klemm, of New York University, who gave the demonstration at Columbia University, said the camera used was similar to an ordinary one except that a spark vibrating with high frequency took the place of a shutter.

Pictures of a whirling aeroplane propeller, taken at the rate of only 2,100 a second, showed the blades turning at a rate not much faster than a slowly revolving door.

The pictures of the bullet shattering the glass bulb taken at the high frequency exposures showed the shattered glass fragments falling through air so slowly as to be hardly perceptible.

Countless tests and experiments, covering a period of over thirty years, prove that aluminum is the only completely satisfactory material which can pack ten. Rose test is put up only in aluminum, and a "money-back" guarantee goes with every package.

slipped down the mountain, without a sound, and laid low every stalk and every bloom in his garden, and he laid down his work back the way it came. The morning sky was blue and bright, the sun was warm, and playful little breezes turned the dead flowers over, just to be sure that none were missed. When Helmi came out and saw the work of the night she wrung her hand—but only for a minute. That day she asked the dead stalks into a pile, and she burned them where they were dry and dug the garden for her next year's planting.

Helmi had not yet brought herself to ask for the two hundred dollar. Jack had left. She wished the time-keeper would give it to her without asking for it, but the days were long and she knew she must go soon. She would not let Mrs. McKinnon or anyone think she was grieving or in distress. Jack had told her that the greatest thing in married life was to trust and not be afraid, so she affected a gaiety she did not feel, which she deceived the "little" lady.

"These foreigners haven't got any feelings," Mrs. McKinnon told her. "Mrs. Turner, 'Now don't you think Helmi would feel a little shy, but pass her house any time you like and you can hear her sing, and as long as the days were nice she was either working in the garden or sitting outside sewing. And mind you, she went into the store and asked for white flannel from Jim Dawson—Mrs. Dawson told me. Well, at course, she was a little shy, but she was a good girl, and her standards have never been like ours. Mr. McKinnon often told me it was too shy, it was the proud Western lady!"

Helmi waited until the middle of the month. Still no letter, no word. There was no use going to the post-office. The same mistake had been made—"Nothing there." She could hear it all the time, beating, beating, as if it were her heart. But always she had been able to smile and say something, words she had prepared on the way down.

One day she went to the study list mine office and spoke to the time-keeper about the wages Jack was owed. The time-keeper sat in his shirt-sleeves making out his accounts. The place reeked of stale tobacco and of grey on the white down-suit. Quite frankly Helmi explained her reason for going to the city.

The time-keeper looked confused and embarrassed. "I'm awful sorry, Helmi," he said, "but it looks as if there had been a mistake here some place. There was two hundred dollars owing to Jack when he left, but a man came one day with an order from Jack and I gave him the money. He said when Jack got to Peace River he found there were some things he needed. It was about a week ago, I think, if I remember—I have the order here, if you would like to see it. You see, I didn't know you would be coming, it is anything. I would have refused this fellow, but he had the order and I couldn't very well do anything but pay the money over."

(To Be Continued.)

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to threaten death? From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought health and happiness. It is known and praised in every section of this broad land.

Peace, Perfect Peace
Extract from a Letter Sent by a Soldier to His Wife

The following preciously preserved extract from a love letter written home to his wife by a soldier on active service will evoke tender memories in thousands of our former service men:

"Don't send me no more nagging letters, Helmi. They don't do no good. I'm three thousand miles away from home, and I want to enjoy this war in peace."

Employer: What kept you from yesterday, acute indigestion again?

Typist: No, a cute engineer this time.

All speed limits were exceeded in the last minute rush for motor licenses.

Leopards is supposed to have been brought to America by the negro slaves.

A Lady and a Diplomat

Difference Between Them Is Defined By U.S. Minister

Hon. William Phillips follows the methods of the public men of his country who provide at least one story to a speech. In paying tribute to Canadian women's organizations at the Women's Canadian reception in Toronto, in honor of Mrs. Phillips and herself at Casa Loma, the U.S. Minister declared he could never say "yes" to them. That reminded him of the story in which he quoted the difference between a lady and a diplomat.

"A diplomat says 'yes' when he means perhaps; but when he says 'perhaps,' means no; and when he says 'no,' he is no diplomat. On the other hand, a woman says 'no' when she means perhaps; says 'perhaps' when she means yes, and when she says 'yes' she is no lady."

Seek New Variety Of Wheat

Wheat With High Degree Of Resistance To Stem Rust Is Desired

The production of a variety of wheat combining high yield and good baking qualities with a high degree of resistance to stem rust, is one of the most pressing problems at the present time according to the Dominion Department of Agriculture. Careful consideration is being given to rust resistance in new varieties and strains developed by the Dominion Experiment Station at Ottawa. New varieties are produced chiefly through the medium of artificial crossing of carefully chosen parent varieties, the crossing work being continued chiefly at the Central Farm at Ottawa and to the Rust Research Laboratory at Winnipeg.

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and give improper food to them, "and everything that grown up people do." Such a course is almost certain to bring on indigestion, and the foundation of much ill-health for the future.

Other mothers administer harsh, unpalatable purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Probably the most mistake should be given to a child until it reaches the age of 18 months. Then only if approved by the doctor. For medicine, all taken, the child's health should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the newborn child. They quickly relieve constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Palace Of Augustus

New Excavations On Palatine Hill Are Expected To Reveal Treasures

The new excavations which have been started on the Palatine Hill have for their ultimate object the uncovering of the Palace of Augustus. A wall nearly 200 feet long and about 36 feet high has already come to light, and it is hoped that some good marbles and other artistic objects which once adorned the residence of the Caesars will later be discovered. The Palace of Augustus actually consisted of several buildings, including a temple and two well-stocked libraries of Greek and Latin books. It is known, however, that many of the imperial buildings were buried in earthquakes during the Middle Ages, and there are hopes that a part of their treasures may still be recovered from their remains. The buildings were adorned by more than 100 columns of alabaster and rare marbles, the porticoes contained several marble statues, while the interior was lavishly decorated with paintings and mosaics, artistic gems and canons.

British Youth For Canada

Movement Is Expected To Be Heavier Than Last Year

The movement of British youth to Canada promises to be considerably heavier than usual, due to new arrangements, made with the British Government, Ontario is taking 500 boys, Manitoba 50, and the Maritime Provinces and Saskatchewan an indefinite number, while some home drafts are to be absorbed by private organizations. In all it is estimated some 2,000 boys will probably be brought up under the new scheme this summer.

The less the average man knows about a thing the more he wants to talk about it.

Train Load Of Farm Tractors

Largest Train Of This Kind That Has Ever Crossed Western Canada

An indication of the prosperity and development of Western Canada was given recently when a trainload of farm tractors passed through Winnipeg westbound. Made up of 52 cars, the train was said to be the largest containing farm implements ever to cross the Canadian prairie. The bulk of the tractors will be distributed from Melfort and Humboldt, Saskatchewan, to various parts of that province. Eight cars went to different points in the province of Alberta.

Germs cannot resist the new liquid germicide known as S.T. 37, which destroys bacteria so quickly that it is impossible to figure the time in which the reaction takes place.

We blame our ancestors for our faults, just as they blamed their ancestors for theirs.

Too many persons mistake notoriety for fame.

Little Helps For This Week

My Shepherd is the Lord my God.

There is no want, I know; His rocks He leads in verdant meads.

Where's tranquil waters flow, He doth restore my fainting soul.

With His Divine cress, And when I stray He points the way To paths of righteousness.

Through every step in life, He shepherd others to guide us, if we will but hear His voice and follow Him. He never broadens smooth paths, but He does promise safe ones. If we follow Him we may find the steepest cliff "a path of pleasantness," and the lowest vale of humiliation a highway to peace.

—Theodore L. Proctor.

Tom—"It's a great procrastinator."

Mabel—"He is? Well, he used to be the dumbest kid in school."

A fugue is a musical composition on one or more parts, themes which are reintroduced from time to time.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headaches are caused by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) in the Bayer Manufacturing. While it is well known that Aspirin means Bayer Manufacturing, to ensure the public against imitations, the Tablets are also marked with the word "Bayer" across the middle.

Cuticura Treatment For Dandruff

Part the hair gently root in Cuticura Ointment until the whole scalp is covered. Let the Ointment remain on for some time, over night if convenient, then wash with Cuticura Soap and warm water. (Do not rub soap on the hair.) Lather thoroughly. A light application of Cuticura Ointment to the scalp between shampooing is often beneficial.

Cuticura Soap and Ointment are sold everywhere. Price, 25c. per box. Cuticura Co., New York, N.Y.

FARM FOR SALE

We have for sale the W4 28-215 West of 4th, a good half section of land 21 miles from Oyen, Alberta, 200 acres under cultivation, buildings in a fair state of repair and consisting of house, stable and two granaries. We will receive written offers for this property at our office, Canada Life Building, Calgary, Alberta, at any time before Tuesday, March 27, 1928. Refer to file No. 35557 W.C.R. MACLEOD, ROBERTSON, WINTER and EDMONDSON, Barristers and Solicitors, Calgary, Alberta.

About Town and Country

The following ladies left this morning to participate in the hospital which starts to day at Marengo. Mrs. Ray Anderson, Miss Josie Love, Mrs. Arthur Johnson and Mrs. Thos. Lees.

Following the milder weather of the latter part of last week, the temperature for the last four days has been colder with light snow flurries. The mercury has been hovering just above the zero mark since Sunday.

At a recent meeting of the Ladies Aid of the United Church, it was decided to divide the organization into three groups, each group to raise during the year a sum of \$200 to be placed in the church building fund.

Mr. and Mrs. Arthur Kerr, who have been spending the winter months in Ontario, returned to Oyen last Thursday.

Automobile license plates may be had by calling on F. C. Bliss at the Fire Hall, Oyen.

Auction Sale on Section 1, Twp. 26, Rge. 9, W. 14th on Tuesday, March 27, Farmstock, Implements, Hay, Grain and Household goods etc. Wm. Cooper, owner. J. W. Bredin, Auctioneer.

Mrs. Harry Rlys, who has been visiting her parents in Redlands, Alta., returned to Oyen last Thursday.

Mrs. Robert Nisbet, who left Oyen last Thursday, is visiting at the home of her husband's parents in Calgary.

The Fairbanks U.F.A. debate, scheduled for March 9, has been postponed until Friday, March 16.

Mrs. J. C. Dessio, who has been visiting Mr. and Mrs. H. Hancock in Edmonton, returned to Oyen last Saturday.

CARD OF THANKS

Mr. and Mrs. Frank Thayer wish to express their thanks to friends and neighbours for the kindness extended and flowers sent during their recent sad bereavement.

Under the auspices of the ladies curling club, a moccasin dance will be held on the ice on Friday, March 9. (If you have no moccasins, wear rubbers). Orchestra, lunch and everything 50 cents.

Charlie Wong and his brother, of the Noble Cafe, left last Friday for Vancouver, en route to China, where they will spend a holiday. They expect to return to Oyen in about a year.

Group 2, of the Ladies Aid will serve a Chinese tea—Chop Suey, tea and bread and butter, in the Cooper Building, on Saturday, March 10. Six young ladies will be dressed in Chinese costume for the occasion. Tea served from 5 p.m. on.

Under instructions from Mr. W. I. Jakes, I will sell at public auction, at his farm on the east half of Section 23, Township 26, Range 5, 8 miles south and 4 miles west of Oyen, Horse, farm machinery and household goods, on Wednesday, March 14. Lunch served. Sale to commence sharp at 1 o'clock. B. H. Dial, auctioneer. Don't miss this sale.

The New Ford Car

(Continued from page 1)

miles an hour and has a turning radius of only 17 feet.

There are so many new innovations embodied in the new car that space does not permit us to enumerate them here. Mr. Chas. P. Snyder, local dealer, will gladly demonstrate the new model and explain all the salient features to you.

Production is being steadily advanced at the Canadian plant and deliveries to local dealers are looked for at an early date. Plans of the Ford Motor Co. anticipate a maximum production in their Canadian and United States plants of 12,000 cars per day by mid-summer. In other words, with this production figure maintained, over 1,600,000 cars will be turned out of their plants in 84 working days.

The Mixed Bospital

The mixed bospital, commenced last week, is nearing the final stages. The competition has been notable for a number of very keenly contested games.

The results to date are as follows:

Tuesday, Feb. 28—	Dial—A. Wright	Dial W. V. Miller—Marshall Miller
Wednesday, Feb. 29—	Trewin—Hay	Trewin Gallekon—Gillespie Gallekon
Thursday, Mar. 1—	C. Wright—Langmuir	Wright W. V. Miller—McNeill
Friday, Mar. 2—	Gallekon—Miller	Miller C. Wright—J. Love
Saturday, Mar. 3—	Whitlock—McMurry	McMurry Stewart—Peterson
Sunday, Mar. 4—	Loos—Morrison	Loos Wright—McNeill
Monday, Mar. 5—	Lees—Gibson	Gibson Dial—Miller
Tuesday, Mar. 6—	Thygesen—Maise	Thygesen MacArthur—Johnson
Wednesday, Mar. 7—	Peterson—McMurry	McMurry Thygesen—Johnson
Thursday, Mar. 8—	Gibson—McMurry	McMurry Johnson—Gibson
Friday, Mar. 9—	Johnson—Gibson	Gibson Miller—McNeill

The winners play off in final game.
